

Madeinadd.com end-to-end encryption

At madeinadd.com, we prioritize the security and privacy of your information. We employ state-of-the-art encryption protocols to safeguard data every step of the way. Our website utilizes secure end-to-end encryption powered by Cloudflare's TLS (Transport Layer Security) technology, endorsed by Google.

Our Partnership with Cloudflare

Cloudflare is a global network designed to make everything you connect to the Internet secure, private, fast, and reliable. By partnering with Cloudflare, we ensure that our website benefits from their advanced security features, including SSL/TLS encryption, to protect against DDoS attacks, data breaches, and other cyber threats.

How Madeinadd Utilizes SSL/TLS Encryption

By leveraging Cloudflare's robust SSL/TLS encryption services, Madeinadd ensures that your browsing experience on our website is secure and trustworthy. Here's how it benefits you:

- **Encrypted Communication:** Every piece of data sent between your browser and Madeinadd's servers is encrypted, making it unreadable to anyone who might intercept it. This protects your sensitive information from potential cyber threats.
- **Secure Transactions:** For customers making purchases or submitting personal information, our SSL/TLS encryption provides a secure environment for these transactions, giving you peace of mind that your data is protected.
- **Trust and Confidence:** Our website displays a padlock icon in the address bar, indicating that our site is SSL/TLS secured. This symbol is a mark of trust and verifies that Madeinadd has taken the necessary steps to secure your data.

✔ Your SSL/TLS encryption mode is Full
